

**Year 4 – Geometry – Finding the perimeter on a grid**

**Remember...**

To calculate the perimeter on a grid, you need to count each square across each side and add them together.

1. Calculate the perimeter of these shapes on this centimetre squared grid

2. Work out the perimeter of each shape and then compare perimeter using  $<$ ,  $>$  or  $=$ .

a)

b)

c)

3. Draw **two** shapes with a perimeter of 20cm.

4. Can you draw a shape with half the perimeter of question 3?
