

Year 5

Week 6

Lesson 2 – finding area of a composite shape

Challenge 1

Calculate the area of this composite shape by counting the squares inside. Show your answer in  $\text{CM}^2$

Area =

Area =

Area =

Challenge 2

Calculate the area of these two composite shapes. (Not to scale). The first one has been split into two for you and has arrows for guidance.

Challenge 3

Calculate the area of this composite shape. Be careful, there are some missing sides for you now to deal with.
